

AQUASOL AUI

ADVANCED UNIVERSAL INTERLOCK

Meets MAHC standards for interlock controls and flow deactivation.

Safety Interlock for Pools

The Advanced Universal Interlock provides multi-layer protection against accidental chlorine gas creation in pool circulation systems. Configurable to work with all chemical controllers and feed systems.

- ▶ Stops chemical pumps upon loss of flow
- ▶ Complete and log 30-day challenge tests

AUI Features

EASY RETROFIT

Simple to install on any existing chemical system for multi-layer protection.

MULTIPLE INPUTS

Accepts up to three switch device inputs that detect pool flow.

MULTIPLE OUTPUTS

Output can signal flow loss to controllers or shut chemical pumps directly.

USB SAVING

Challenge test activity saved in device and exportable via USB.

FLOW ALERTS

Sends operator alerts when flow is interrupted. Supports external alerts.

TEST REMINDERS

Indicator LED flashes when new challenge test is required.
